

About CTC

Company History

Computer Technology Corporation (CTC) was established in Nashville, TN, in 1978. The company's initial success was based on the development, installation, and management of electronic billing systems for physicians' offices. In the 1980's, CTC began selling, servicing, and supporting personal computer systems and networks. As information technology systems became an integral component in many businesses, CTC focused its efforts on providing the services and solutions required to support the technology needs of businesses.

Today, CTC provides businesses both small and large the technology solutions that are cost effective and allow your key employees to stay focused on their primary business responsibilities.

Mission Statement

CTC provides a one stop solution for technology products and services by leveraging its own abilities and expertise as well as those of its strategic partnerships.

Financial Background

CTC is a privately held, debt-free corporation. The company has shown consistent growth over the past 6 years, and we anticipate continued success as our Nashville location matures and we expand into new markets. CTC has nearly 1 million dollars in purchasing power before tapping into external sources. The company has a perfect credit history and we do not anticipate difficulties expanding our purchasing capacity when needed.

Products and Services

CTC provides information technology planning, procurement, installation, support, and management services for businesses. In an industry as diverse and ever-changing as the technology industry, we believe it is essential to establish certain areas of expertise and develop partnerships with experts in different areas.

CTC Specializes in:

- Microsoft Windows Server System
- Server-based Computing Solutions
- Technology Procurement Services
- Security/Virus Protection
- Wireless Corporate Messaging
- Hosting/Application Service Provider (ASP) Services

Our Partners Provide:

- Datacenter Services
- LAN to LAN Connectivity
- Custom Programming Services
- Cabling Services

Organizational Structure

Sales Department:

Our Sales Department consists of individuals with varying fields of expertise: Jim Marable (CTC's President), Erich Mahnke, and from our western region sales division, Brian Wieland. Together, this team brings over 36 years of technical sales expertise to the table. Individually, your sales representative will guide you through the task of helping your organization get the solution it needs.

You will work primarily with one of the sales team members; however, we work as a team to provide the highest level of service to our customers. When your primary sales representative is unavailable, another sales team member will gladly assist you.

Service Department:

Our Service Department consists of industry-certified engineers with various specialties, and a Service Coordinator. Richard Poole - Director of Professional Services, provides the highest level of technical expertise to our service department. His certifications include MCSE and CCEA. Tim Fisher - MCSE, MCP+I, CCA, and John Thorburn - MCSE, MCP+I, CCA, who is CTC's Project and Service Department Manager, are engineers who provide the skills required to complete advanced and day-to-day computer and network related needs. Ginger McIntosh is our Service Coordinator. Ginger schedules projects and manages the workflow through the Service Department. As technology is constantly evolving and changing, all engineers in the Service Department are continuously updating their training and certifications.

Your primary contact for service requests will be the Service Coordinator. Once a job is scheduled, you can rest assured that our Service Department will complete the task in a professional and efficient manner.

Accounting Department:

Our Accounting Department consists of one in-house individual and an outside CPA. All customer-related accounting questions, such as accounts receivable and credit memos, can be handled in-house by Anna Taylor.
