

Comparison of Treo 600 and Blackberry 6200

Trackwheel

Requires scrolling through menus to access info – favors Right Hand – no touchscreen

No expansion capabilities

No Touchscreen

Doesn't extend capabilities

No speaker phone

Awkward for advanced phone operations.

No apps buttons

Must use the track wheel and menus.

No Dial Pad in keyboard

Numbers are PC style, not phone style, keys are flat

Phone is an afterthought

Evolved from an email pager. Some customers still carry an extra phone.

Touchscreen

Uses screen to extend capabilities – dial pad, applications, signature capture...

Wide expansion capabilities

Supports industry-standard SD/MMC/SDIO cards. Add memory, file, applications, peripherals.

Speaker phone

Excellent for conference calls and hands-free.

5-way navigator

Designed for one-handed (L or R handed) operation and ease of use.

Programmable apps buttons

Immediate access to calendar, contacts, email, etc.

Dial Pad in keyboard

Domed keys make typing easy and accurate.

Superior phone design

Designed from scratch as a best-of-breed smartphone.
